

Approval

It is deemed that the Customer has given consent to the application of these conditions and has approved of the contents hereof without any objection. Full conditions of sale are available on the website easycubes.eu. The user acknowledges having taken notice of, and accepts irrevocably to be bound by the General Sales Terms.

Limited liability

Easybuild Bvba shall not be subject of any legal liability in relation to the assembly and installation of the Products. Easybuild Bvba shall not be subject to any legal liability for damages caused to the product, or damages caused while the Customer is (dis)assembling or installing the products.

Third party

In the event that the Customer enters into a (paid) services contract with an assembler for the assembly and installation of a Product the terms of such contract shall be in accordance with the terms and conditions set forth by the assembler.

Keep away from children

EASYCUBES Products are no toys. Do not allow children or minors to use this Product. Customers shall keep EASYCUBES Products away from them.

Excessive pressure

EASYCUBES Products may only be used to display products not exceeding 30 kg per 400x400mm panel. Customers shall not apply excessive pressure on EASYCUBES Products and shall by no means step or stand on EASYCUBES Products or use EASYCUBES Products as human display stages.

Heavy Objects

Too heavy loads could cause an EASYCUBES component or an EASYCUBES skinpanel to loosen from the surface that it is attached to. Falling objects could lead to serious injuries. High safety caution is strongly advised. Don't use EASYCUBES Products in places where people could get injuries in case of material failure.

Assembly responsibility

Customers shall make sure the used structure never exceeds the maximal load mentioned above. Customers shall owe a duty of care and verification of design and assembly. The assembly and installation of EASYCUBES Products shall be performed by the Customer at the Customer's own responsibility.

Qualified & adequate

Ensure that the EASYCUBES Products are used for their intended purpose only. All installations must be done in accordance with local policies. The installation should be done by qualified personnel only.

Interior use only

EASYCUBES Products are suffering from direct sunlight. Exposure to direct sunlight may affect strength, impact resistance and other technical features of EASYCUBES Products or assemblies. EASYCUBES Products should not be used after being exposed to direct sunlight for periods longer than 72h. Special UV shield masterbatches that provide an efficient protection against photochemical and thermo-oxidative degradation are available on request.

Combustibility

EASYCUBES products are not fire resistant and can ignite. Special fire resistant and fireproof EASYCUBES products are available on Customer request. EASYCUBES Products are flammable when exposed to high temperatures.

Temperature resistance

EASYCUBES Products have a usage temperature between -20 and +50 °C degrees . Do not use EASYCUBES Products in places where they are exposed to extreme heat or cold. Higher or lower temperatures than those listed may affect strength, impact resistance and other technical and mechanical features.

Structural verification

Make sure the used support structure stays under the maximum load restrictions mentioned above. In regions with high possibility of wind entering the building of installation, make sure that the structure (its mounting design) is able to withstand the local environmental forces. We also urge that assembly fixtures should be regularly inspected.

Mechanical treatment

EASYCUBES Products can get brittle. When drilling or sawing an EASYCUBES component, you change it's specifications and therefore it's (mechanical) characteristics. Some parts of Products may become unstable and break. Let us provide you with an offer for a custom made order instead of doing it yourself.

Splinters

EASYCUBES Products can get brittle. Parts could crack. Sharp splinters could be catapulted away for several meters and cause eyes or other injuries. Avoid the collision of EASYCUBES Products. Wear safety glasses when handling. Make sure that nearby people are also protected and keep their distance.

Cleaning

EASYCUBES Products may be cleaned by potable, non-heated water. Normal water pressure is sufficient. No cleaning products are to be used. Heavily sticking impurities are to be removed by a soft cleaning tool like a sponge or cleaning cloth. Use of cleaning chemicals or sharp instruments to clean the Products will damage the product, and therefore invalidate the product warranty.

Surroundings

Prior to assembling, installing and using the Product, make sure to check in advance whether the colour of the product will migrate to the floor / furniture where the product will be installed. For Products to be placed on the wall: check in advance the quality of the wall, including its strength. For Products to be placed on the floor: check in advance the quality of the floor, including its strength. For Products to be attached to the ceiling: check in advance the quality of the ceiling, including its strength.

Contusions

Unsafe handling could cause jamming fingers or skin in between EASYCUBES Products which may lead to contusions and bruises. Please wear safety gloves and protective clothes (incl. safety shoes) while assembling EASYCUBES Products.
